

Hands-on Lab 2: Creating Advanced Charts

Estimated time needed: 20 minutes

In this lab, you will learn how to create some advanced charts in Excel. We'll first create a sunburst chart, then a scatter chart, and lastly a histogram.

Software Used in this Lab

The instruction videos in this course use the full Excel Desktop version as this has all the available product features, but for the hands-on labs we will be using the free 'Excel for the web' version as this is available to everyone.

Although you can use the Excel Desktop software if you have access to this version, it is recommended that you use Excel for the web for the hands-on labs, as the lab instructions specifically refer to this version, and there are some small differences in the interface and available features. If you do not yet have access to Excel for the Web, you can follow the instructions in the following lab to get started with it: [Hands-on Lab: Introduction to Excel for the web](#).

Dataset Used in this Lab

The dataset used in this lab comes from the following source: <https://www.kaggle.com/gagandeep16/car-sales> under a [CC0: Public Domain license](#). We are using a modified subset of that dataset for the lab, so to follow the lab instructions successfully, please use the dataset provided with the lab, rather than the dataset from the original source.

Objectives

After completing this lab, you will be able to:

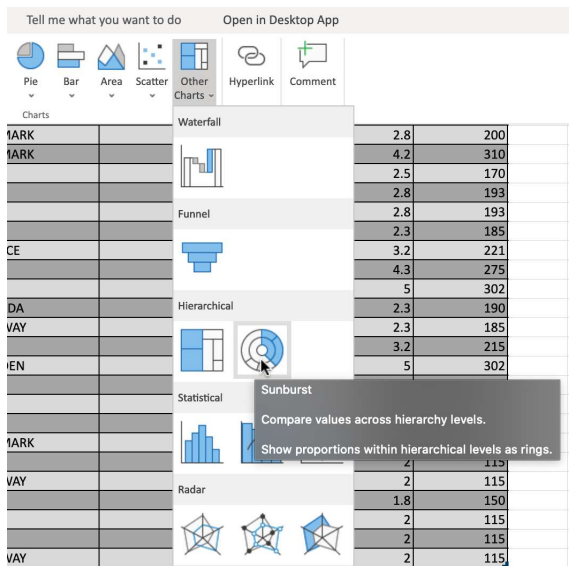

- Create a hierarchical type chart such as a sunburst chart.
- Create a scatter chart.
- Create a statistical chart such as a histogram.

Exercise 1 : Creating Sunburst, Scatter and Histogram Charts in Excel

In this exercise, you will learn how to create advanced charts, such as a sunburst chart, a scatter chart and histogram charts in Excel.

Task A : Create a Sunburst Chart

1. Download the file [Car Sales Kaggle DV0130EN Lab2 Start.xlsx](#). Upload and open it using Excel for the web.
2. Switch to the worksheet named **Sunburst Chart**.
3. Click the **filter drop-down** in column **A (Manufacturer)**, and select **Filter...**
4. In the list, only select **Nissan** and click **OK**.
5. Select column **B**, then hold **SHIFT** and select column **C**.
6. On the **Charts** group of the **Insert** tab, click **Other Charts** and choose **Sunburst** from the **Hierarchical** category.

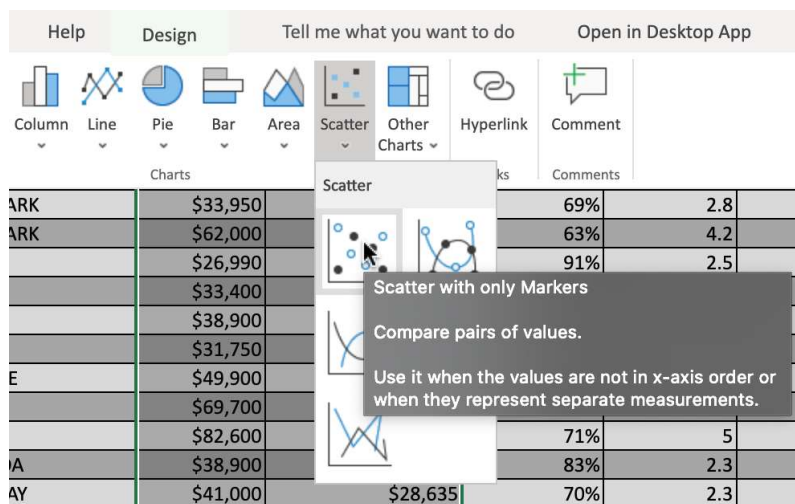

7. Click on the floating chart area to access the **Chart** tab in the ribbon.
8. On the **Labels** group of the **Chart** tab, click **Chart Title** and select **Edit Chart Title....**
9. In the text input area of the dialog box **Edit Title**, write "**Unit Sales of Nissan Cars**" and click **OK**.
10. On the **Labels** group of the **Chart** tab, click **Legend** and select **Show Legend at Right**.
11. Your chart should look something like the one below:

Task B : Create a Scatter Chart

1. Switch to the worksheet named **Scatter Chart**.
2. Click the **filter drop-down** in column **A (Manufacturer)**, and select **Filter...**
3. In the list, only select **Audi, BMW, Mercedes-B, Porsche, Volkswagen** and click **OK**.
4. Select column **E**, then hold **SHIFT** and select column **F**.
5. On the **Charts** group of the **Insert** tab, click **Scatter** Chart and choose **Scatter with only Markers** from the **Scatter** category.

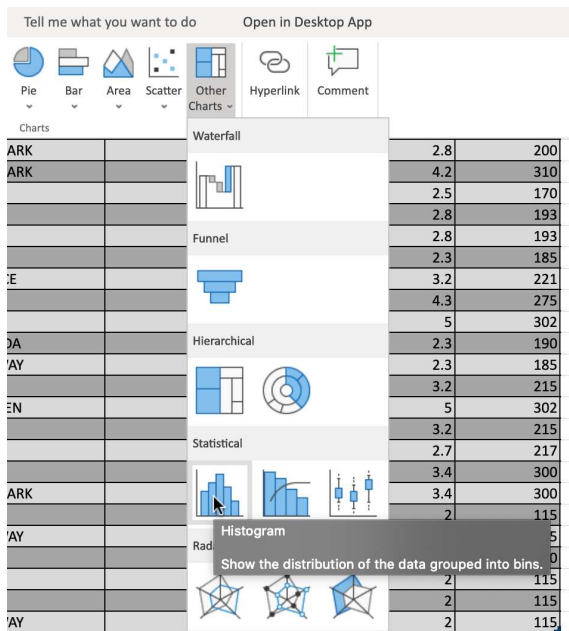

6. Drag the chart across to the right of the sheet.
7. Click on the floating chart area to access the **Chart** tab in the ribbon.
8. On the **Labels** group of the **Chart** tab, click **Chart Title** and select **Edit Chart Title...**
9. In the text input area of the dialog box **Edit Title**, write "**Comparing Price with Year Resale Value of German Cars**" and click **OK**.
10. On the **Labels** group of the **Chart** tab, click **Axis Titles** and select **Primary Horizontal Axis Title > Edit Horizontal Axis Title...**
11. In the text input area of the dialog box **Edit Title**, write "**Price**" and click **OK**.
12. On the **Labels** group of the **Chart** tab, click **Axis Titles** and select **Primary Vertical Axis Title > Edit Vertical Axis Title...**
13. In the text input area of the dialog box **Edit Title**, write "**Year Resale Value**" and click **OK**.
14. On the **Labels** group of the **Chart** tab, click **Legend** and select **None**.
15. Your chart should look something like the one below:

Task C : Create a Histogram Chart

1. Switch to the worksheet named **Histogram Chart**.
2. Click the **filter drop-down** in column **A (Manufacturer)**, and select **Filter...**
3. In the list, only select **Audi, BMW, Mercedes-B, Porsche, Volkswagen** and click **OK**.
4. Select column **B**, then hold **SHIFT** and select column **C**.
5. On the **Charts** group of the **Insert** tab, click **Other Charts** Chart and choose **Histogram** from the **Statistical** category.

6. Drag the chart across to the right of the sheet.
7. Click on the floating chart area to access the **Chart** tab in the ribbon.
8. On the **Labels** group of the **Chart** tab, click **Chart Title** and select **Edit Chart Title...**
9. In the text input area of the dialog box **Edit Title**, write "**Count of German Car Models by Price Range**" and click **OK**.
10. On the **Labels** group of the **Chart** tab, click **Data Labels** and select **Center**.
11. On the **Format** group of the **Chart** tab, click **Format**.
12. On the right side menu bar **Format**, select **Series "Price" > Fill > Orange, Accent 2**.
13. Your chart should look something like the one below:

Congratulations! You have completed Lab 2, and you are ready for the next topic.
